Natalie Malka Isenberg

Email: nisenberg@cmu.edu |Phone: 410-299-9125 | Web: natalieisenberg.com

Education

University of Pittsburgh – B.S. Chemical Engineering (August 2016)

Carnegie Mellon University – Ph.D Chemical Engineering (August 2016 – December 2021)

Research Interests & Expertise

Mathematical modeling, mathematical optimization, mixed-integer linear programming (MILP), nonlinear programming, nonconvex optimization, materials design, catalysis, alternative energy technology, process systems engineering, robust optimization, machine learning, decision-making under uncertainty

Technical Skills

Programming Languages: C++, Python, Julia, Java, MATLAB

Optimization Software/Packages: IBM ILOG CPLEX, Gurobi, IPOPT/IPOPTH, BARON, GAMS, Pyomo

Languages: Fluent in English and Hebrew, proficient in Spanish

Experience

Amalie Emmy Noether Postdoctoral Fellow, **Brookhaven National Laboratory, Computational Science Initiative**

(Fall 2021 – Present)

- Performing **uncertainty quantification** for biological pathway models for use in generative molecular design
- Devising **optimization under uncertainty** approaches for complex decision-making problems

Graduate Student Researcher, **Gounaris Research Group, Carnegie Mellon University, Department of Chemical Engineering**

(Fall 2016 – Fall 2021)

- Formulating and solving **mathematical optimization models** to determine optimal **materials** for CO_2 adsorption
- **Developing Robust optimization** techniques for large-scale, non-convex **nonlinear** process models
- **Collaboration** with the National Energy Technology Laboratory (NETL) to create a robust optimization package in Python for the Institute for the Design of Advanced Energy Systems (IDAES) project

***Graduate Student Research Fellow*, U.S. DOE Office of Science Graduate Student Research Fellowship (SCGSR)**

(Spring 2020)

- Working with scientists while visiting at Sandia National Laboratories (SNL) Discrete Math and Optimization team to develop novel **robust optimization software**

Research Intern, **DAAD Research Internship in Science and Engineering (RISE)**

(Summer 2015)

- Awarded research internship in Germany to investigate effects of modified **ceramics** in energy storage processes

***Undergraduate Researcher,* Swanson School of Engineering, University of Pittsburgh, Dr. C. Wilmer**

(Fall 2015 – Fall 2016)

- Studied computational methods for chemical **gas sensors** using **metal organic frameworks**

***Research Intern*, Mascaro Center for Sustainable Innovation (MCSI), University of Pittsburgh, Dr. G. Veser**

(Summer 2013 – Summer 2014)

- Headed research project to test **dopants** in cerium dioxide **supports** for improved structural integrity and oxygen availability

- AIChE Annual Meeting (2019), *Robust Optimization for Chemical Process Design and Applications to Carbon Capture Technology*, **N.M. Isenberg**, P. Akula, D. Bhattacharya, D.C. Miller, C.E. Gounaris
- AIChE Annual Meeting (2018), *Identification of Optimally Stable Nanocluster Geometries via Mathematical Optimization and Density-Functional Theory*, **N.M. Isenberg**, Z. Yan, M.G. Taylor, C.L. Hanselman, G. Mpourmpakis, C.E. Gounaris
- INFORMS Annual Meeting (2018), *Mathematical Optimization Based Approaches for the Design of Materials in Energy Applications* **C.E. Gounaris**, C.L. Hanselman, N.M. Isenberg

Relevant Coursework:

- Linear Programming
- Integer Programming
- Constraint Programming
- Introduction to Machine Learning
- Defects in Materials
- Special Topics: Process Systems Engineering
- Modern Convex Optimization

Volunteer and Leadership Experience

Outreach Coordinator, Carnegie Mellon University, Chemical Engineering Graduate Student Association(2017-2019)

- Coordinated and ran STEM related volunteer events for graduate students

Secretary, Pittsburgh-Cleveland Catalysis Society (PCCS), (2019-2021)

- Managed abstract submissions and communications for the PCCS Annual Research Meeting

Symposium Chair, Carnegie Mellon University, Chemical Engineering Graduate Student Association, (2018-2019)

- Organized annual student research symposium

Volunteer Judge, Pennsylvania Junior Academy of Science Region 7, (2017, 2018, 2019)

- Judged elementary and middle school student science fair presentations and determined special award recipients

Teaching Assistant (TA), Carnegie Mellon University, Department of Chemical Engineering

- Introduction to Chemical Engineering (Fall 2016)
- Optimization Modeling and Algorithms & Chemical Process Design (Spring 2017, Spring 2018, Spring 2019)

Volunteer Instructor, Propel EAST Middle School, (2015 - 2016)

- Taught a weekly introductory creative programming course to elementary and middle school students

Awards

Research Awards:

- Presidential Fellowship, Carnegie Mellon University College of Engineering Awardee (2020)
- DOE Office of Science Graduate Student Research Fellowship Awardee (2019)
- Foundations of Computer-Aided Process Design (FOCAPD) Poster Award Winner (2019)
- 2nd Place, EQT Optimization Poster Award, CAPD Annual Review Meeting (2019)
- Bayer/Covestro Award for outstanding undergraduate students in chemical engineering (2016)
- 1st place poster presentation at “Chemical Engineering Research Day” at the University of Pittsburgh (2015)
- 1st place for undergraduate research in the Mascaro Center for Sustainable Innovation Internship (2014)

Outreach Awards:

- Gelfand Student Service Award, Carnegie Mellon University (2019)

Teaching Awards:

- Mark Dennis Karl Outstanding Graduate Teaching Assistant Award, Carnegie Mellon University (2018)
